FREE 240MM

CARTECK HEADROOM KIT

GAS METER IN THE WAY? USE THE FREE 240MM HEADROOM KIT TO LIFT CARTECK SECTIONAL GARAGE DOOR TRACKS UP AND OVER! IT'S A FREE OPTION – JUST ASK!

We talk about the 120mm low headroom that come as standard on every CarTeck sectional garage door a lot, but what if the tracks hit an obstruction? A gas meter, a pass door or some shelving can make for a difficult install...if only there was a way of raising up the tracks...

In steps the 240mm headroom kit. It still allows the ideal panel configuration for the opening but lifts the tracks up an additional 120mm, giving the installer extra room to clear the obstruction.

Better still it's a free option, all you have to do is ask for it when you order the door. It's a great solution to one of those installation challenges, just the sort of thing that makes CarTeck the premium insulated sectional garage door!
