

TECKENTRUP 62 SWING SECURE.

What is Secured by Design?

Secured by Design

Police Preferred Specification

Crime Prevention Initiative

Secured by Design is part of Police Crime Prevention Initiatives (PCPI), a police owned organisation that works on behalf of the Police Service to deliver a wide range of crime prevention and demand reduction initiatives across the UK.

Secured by Design

Secured by Design plays a significant crime prevention role in the planning process to design out crime in a wide range of building sectors. It has achieved some significant success including one million homes built to Secured by Design standards with reductions in crime of up to 87%.

Ensuring standards meet needs of Police & Public

Secured by Design has many partner organisations, ranging from the Home Office, Ministry of Housing, Communities & Local Government and the Police Service through to Local Authorities, Housing Associations, Developers and Manufacturers and works closely with standards and certification bodies to ensure that their publicly available standards actually meet the needs of the police and public alike.

Rigorous testing

Products must be subject to rigorous testing and additionally be fully certificated by an independent, third-party certification body accredited by the United Kingdom Accreditation Service (UKAS) before being allowed to carry the Secured by Design logo - this is the only way for companies to obtain police accreditation for security-related products in the UK.

Teckentrup 62 Swing Secure - Secured by Design as standard

Teckentrup Door Solutions is part of Secured by Design (SBD), the national police crime prevention initiative.

Teckentrup 62 Swing Secure garage door and side entrance door have been tested by BRE to LPS 1175 Issue 8 A1 (SR1) security rating to qualify for the Secured by Design Police Preferred Specification accreditation.

"Saying something is secure is meaningless unless its security has been independently tested and certified to an internationally recognised security standard."
