Wall Switch

WALL SWITCH

What's it for and what are the benefits?

For extra convenience, control your garage door and check its position from within your home with a two function wall switch available in grey or white finish. Also very useful for when you don't have your remote control to hand.

How does it work?

The wall switch is similar in size to a standard single light switch so will not impact on a homes aesthetics. The wall switch receives feedback of radio commands with an LED light indicating to you whether the door is closed or open.

What does it need to make it work?

It is an addition to the Teckentrup DRIVE / DRIVE PRO 500 & DRIVE /DRIVE PRO 600 garage door motors.

What else works with it?

It operates as a stand-alone unit or can be fitted with other Teckentrup DRIVE accessories.

How much is it?

See the current retail price list.
