

Ambience Pack 1

AUTOMATICALLY
ADD MORE LIGHT INTO YOUR GARAGE

**I NEED MORE LIGHT
IN MY GARAGE...**

LIGHTING STRIP & MOTION SENSOR

What's it for and what are the benefits?

Adding an extra lighting strip to the control unit (in addition the light strip on the motor) and combined with a motion sensor, allows for garage door spaces to be illuminated automatically when you enter. No more crashing around in the dark!

How does it work?

Upon detection of movement by the motion sensor, the DRIVE and DRIVE PRO lighting strips will illuminate. When motion is no longer detected, after a short while, the lights will turn off.

What does it need to make it work?

It is an addition to the Teckentrup DRIVE /DRIVE PRO 600 garage door motor (Not compatible with the DRIVE / DRIVE PRO 500).

What else works with it?

It operates as a stand-alone unit or can be fitted with other Teckentrup DRIVE accessories.

How much is it?
