

BULLETIN!

3RD AUGUST 2026

IMPORTANT!

ALL CarTeck Sectional Garage Doors now come with pre-assembled spring trays!

Super fast to fit!

From the 3rd of August, all single layer spring trays (120mm headroom) and NOW double layer* spring trays (140mm headroom) on sectional doors come fully assembled for super-fast installation – We're always looking for new ways to make life easier for our installers!

*Larger doors that have double layer spring trays also feature a new anti-twist roller to ensure the springs stay seated!

The spring trays will be delivered to you fully assembled, with the springs, pulleys, spacers and cables set up and lubricated. The tray lid is on and the tray clips/screws set. There should be no requirement to open the trays. That means spring trays only require a simple cable hook up, dramatically speeding up door installation.

Please note: Pre-assembled spring trays on larger doors are heavy, we would recommend the use of props to support the trays during installation.

Follow steps 3.11A of the fitting instructions for pre-loaded spring tray setup.

"So, which sections of the fitting instructions can I skip?"

- 3.11 Assembling the double and triple spring package
- 3.12 Assembling the quadruple spring package
- 3.13 Installing the spring package into the spring channel
- 3.15 Assembly of the spring channel cover

Scan the QR code to download the latest version of the sectional fitting instructions.

SCAN ME!

Here's what the spring trays will look like when they are pre-assembled.

Scan this qr code or the qr code label attached to the tray lid to watch a video on the quick set up of the cables.

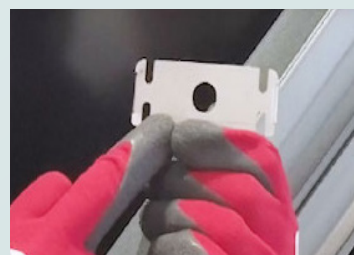

SCAN ME!

Anti-twist bracket

Tape holds the anti-twist bracket in position. This prevents the cables twisting inside the spring tray whilst you set up the cables.

IMPORTANT: The tape and the anti-twist bracket must be removed but only after the cables are installed.
