BULLETIN!

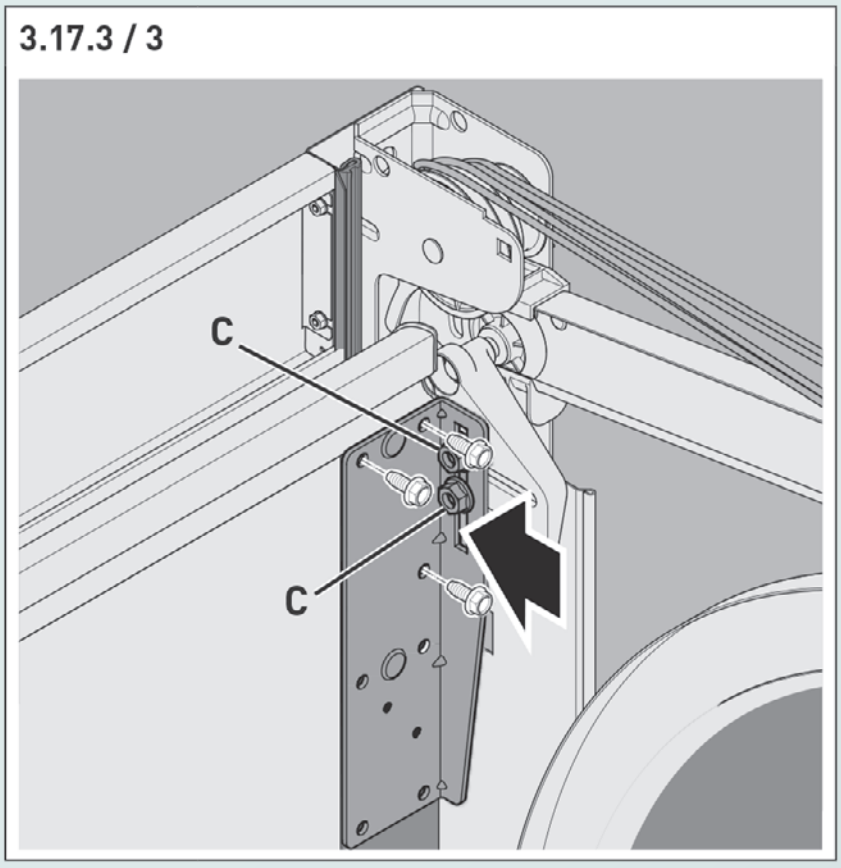
30TH OCTOBER 2026

IMPORTANT!

ALL CarTeck Sectional Garage Doors now come with a revised top roller bracket!

From the 30th October 2026, all CarTeck sectional garage doors will come with a revised top roller bracket. It probably looks familiar to you, as we are now standardising what was the 240mm headroom bracket on all doors!

See the image below for how to fit the bracket in the new orientation...



- Loosen the screws (C).
- Insert the roller of the top roller holder into the black plastic curved rail.
- Screw the left and right holding brackets for the top roller holder onto the upper door section.
