

SECURITY UPGRADE

Side Hinged Garage Door Lock Cylinder Security Upgrade

At Teckentrup, we listen. You told us that the replacement security keys for our side hinged door locks were prohibitively expensive and two keys with each door was not enough. We've addressed it by changing to a new cylinder that enhances security and has three keys as standard. Additionally, replacements keys can now be sourced at lower cost from local key cutters (no need to come to Teckentrup for key cutting!).

The new locks have the following benefits:

- ✓ BS EN1303 Cylinder Security Grade 2
- ✓ Anti-Pick
- ✓ Anti-Drill
- ✓ 3 keys as standard
- ✓ Additional keys can be cut at a high street locksmiths
- ✓ Break off system (designed to prevent the cylinder from being broken by including a 'sacrificial' section that is designed to break off if an attempt to break the cylinder is made, whilst leaving sufficient cylinder remaining to still operate the lock with a key)

All doors manufactured from **Monday 28th of August** will have the new lock.

3 keys as standard

Anti-pick & anti-drill

Internal thumb turn

Break off system
