NO HOLES FRAME

THE BETWEEN FIX SOLUTION

Our no holes frames are the perfect solution for between fix installations.

No holes to the front face of the frame leg means a seamless finish, edge-to-edge.

The no holes frame is available for all finishes including painted wood effect finishes.

If you're fitting part within or fully between the reveal there's no need for 3D cover profiles to cover over frame holes, making installations quicker too!

The size range of our no holes between fix frames goes all the way up to 18'0" (5500mm) wide with a maximum height of 7'4"/2250mm.

To make things easier-still, we have a between fix kit with brackets that allow a fixing to be made behind the frame leg and a twist fix header kit with brackets that facilitate a solid fix for the header by providing a fixing point for "L" shaped brackets.
