

Parking Pack 1

PARK PERFECTLY

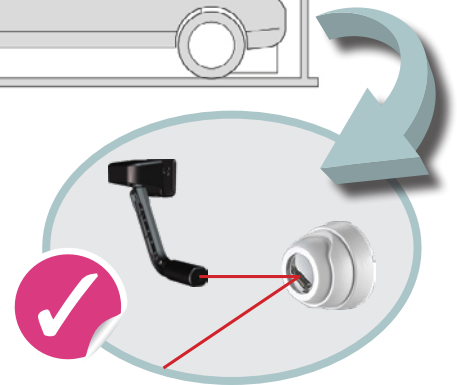

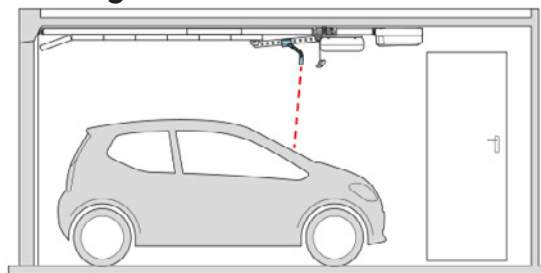

INSIDE YOUR GARAGE

**I WANT TO PARK
PRECISELY WITHIN
MY GARAGE...**

Configuration with reflectors...

Configuration without reflectors...

Laser

Reflector

PARKING LASER & REFLECTOR

What's it for and what are the benefits?

The laser sensor and reflector provide a visual assistance to help guide you to the perfect point for precise parking within your garage. No more near misses or guesstimates and no need for a parking assist system within your vehicle.

How does it work?

The laser sensor works by directing the laser light to a target spot on the vehicle visible from the driver's position, so as you enter the garage, the proximity sensor will turn on the laser and provide optical assistance for positioning.

What does it need to make it work?

It is an addition to the Teckentrup DRIVE /DRIVE PRO 600 garage door motor (Not compatible with the DRIVE / DRIVE PRO 500).

What else works with it?

It operates as a stand-alone unit or can be fitted with other Teckentrup DRIVE accessories.

How much is it?

See the current retail price list.
