PRICING

Prices are in £'s Sterling. This price list supersedes and renders null any previous price list. SIZES When ordering use metric sizes, imperial conversions are nominal.

TERMS

Comprehensive terms and conditions are on line at: www.teckentrup.co.uk/terms-conditions

DELIVERY

To company premises FOC. To site £78 nett. To the Scottish Highlands and Islands on application. Congestion charges apply subject to postcode locations.

LEAD-TIMES

Lead times are subject to change and may be affected by the availability of raw materials, border delays and other factors beyond our control,

After placing your order you'll receive a confirmation with the week of delivery.

We work hard to maintain the advised delivery date and any slippage will be notified as soon as we become aware of an issue.

If you need a door for a specific date please call the sales office, we'll do our best to help.

BUILT FROM STOCK

The styles below are built from stock panels and available on a short lead time. Scan the QR code to see the current lead times for all stock doors and other doors not built from stock panels eg, other door styles, Trend & Trend+ colours, RAL painted doors, alternative surface finishes (Stucco, Micro-Profile, etc) and wood effect finishes.

WHAT PERFORMANCE CAN I EXPECT?

As Part of the UKCA/CE marking process, each product must have its performance provided for a defined set of characteristics. Other characteristics can also be included if relevant to a door's performance, such as security. The following table shows the performance characteristics of each product in our range.

NPD signifies the product has not been measured for this characteristic (NPD - No Performance Determined)

PERFORMANCE CHARACTERISTIC	CarTeck Sectional Garage Doors	CarTeck Super Size Sectional Garage Doors	CarTeck Sectional GSA Vision Garage Doors	CarTeck Sectional SLX Vision Garage Doors	CarTeck Side Hinged Garage Doors

Operating Cycles EN 1191	NPD	NPD	NPD	NPD	NPD

WARRANTY

The warranty periods below only apply to products that have been correctly installed as per the instructions and have been used, maintained by a Garage Door Specialist and cleaned in accordance with the requirements set out in the operating and maintenance sections of instructions and labels.

	CARTECK, SUPER SIZE, GSA VISION & SLX	VISION
	SECTIONAL GARAGE DOORS	
Γ		

2-year manufacturer's guarantee

on polymer and aluminium window units

5*-year manufacturer's guarantee

on SLX & GSA Vision windows, rollers, hinges, cable pulleys, cables and standard springs (opening/closing max. 5 times a day)

10-year manufacturer's guarantee

- on panels against rust penetration from inside to outside
- against door panel separation of steel from foam
- on material and manufacturing flaws of all non-moving parts of the frame that are verifiably unusable or whose usability is substantially compromised
- on floor seal, intermediate seals, side seals and lintel seal against rotting

The guarantee does not apply to doors that are subjected to extreme conditions, e.g. corrosive influences resulting from use in a coastal climate with high salt content.

*2 -year for Super Size

CARTECK SIDE HINGED GARAGE DOORS

2-year manufacturer's guarantee

on window units, hinges, locks, handles and stays (opening/closing max. 5 times a day) **CARTECK DRIVE & MOTOR**

*1 -vear for Super Size

*5-year manufacturer's guarantee

CARTECK COASTAL PAINT FINISHES

3-year for coastal locations

on mechanical defects, material and manufacturing

flaws. (opening/closing max. 5 times a day)**

** Consumable Items are not included within warranty terms

and conditions: hand transmitters, light bulbs, fuses & batteries.

Only applies to doors ordered with the Coastal Paint

upgrade and only covers peeling and blistering (normal

colour fade excluded) on the external face of the panels

only (does not cover staining or bleed from hardware)

10-year manufacturer's guarantee

- on panels against rust penetration from inside to outside
- against door panel separation of steel from foam
 on material and manufacturing flaws of all non-moving
- parts of the frame that are verifiably unusable or whose usability is substantially compromised
- on floor seal, intermediate seals and frame seals against rotting
- The guarantee does not apply to doors that are subjected to extreme conditions, e.g. corrosive influences resulting from use in a coastal climate with high salt content.

HANDLING

CarTeck Sectional Doors are delivered flat-packed & CarTeck Side Hinged Doors are delivered complete. Both are heavy and require suitable consideration for safe handling.

CarTeck Super Size Sectional, CarTeck GSA Vision & CarTeck SLX Vision are delivered crated. Suitable arrangements for safe handling at delivery and onward transportation must be considered.

CLEANING ON INSTALLATION

After the installation has been completed, clean and dry the door thoroughly inside and out with warm soapy water to remove any grease, dust and metal fragments from the door (these will discolour the door finish if left on the door).

MAINTENANCE

Doors must be maintained as per the supplied Installation, Operating and Maintenance Manual by a Garage Door Specialist. Failure to carry out the required maintenance at the advised interval will invalidate the warranty.

CLEANING

The door should be washed with a car shampoo or similar, every two months, to prevent the build up of dirt, salt, grit and other corrosive substances. If the door is in an area prone to coastal corrosion from airborne salts, the door should be cleaned monthly. Furthermore, cleaning lifting gear with a cloth soaked in a light oil will help to protect your door from corrosion — it must be accepted that salt air is very aggressive and extra care is required.

No caustic, abrasive or corrosive chemicals and substances, flood water, water runoff, or runoff from lead, copper or galvanic metal flashing should be allowed to come into contact with the door. Contaminants can lead to oxidisation spots on the external face of the door. Windows that have a mock lead effect may show a white residue due to oxidation over time, this should be removed should it contact painted surfaces.

Ash, cement, dust, animal waste, or foreign substances should be removed immediately. Failure to ensure the door is cleaned and maintained as described will invalidate the doors' warranty.

For more information on what performance you can expect from your garage door, visit the Honesty Page on the Teckentrup website -

www.teckentrup.co.uk/garage-doors/the-honest-page

TECKENTRUP

CARTECK S	SECTIONAL	GARAGE	DOORS	GSW	40-L	install

All single layer spring doors (120mm headroom) are supplied with preassembled spring trays for super-fast Ilation. Does not apply to double layer (140mm headroom doors) see page 12 for applicable sizes.

HORIZONTAL TRACK LENGTHS

SPECIFICATION

GSW 40-L Sectional door

DOOR:

Sectional door double skinned PUR foam core, 40mm thick CarTeck panels. Outer surface finished in choice of 4 standard designs and all standard listed CarTeck colours. Inner surface stucco design, colour similar to RAL 9002. Sections have a centre seal; EPDM, header, and floor seals. Different order heights are made up from mixing panel sizes, 4 different bottom profile sizes and reduced top panel heights.

FRAME:

Door frame is made from galvanized sheet steel, coil coated with polyester, prime coated similar to RAL 9016 or other Trend colour. Protective strips with EPDM sealing lips on both sides of the vertical tracks.

HARDWARE:

Galvanised finish, screwed hinges to all sections, adjustable rollers with ball bearings. Multiple tension springs and double cable system housed in low friction housing above horizontal tracks.

AUTOMATION:

Door prepared for automation as standard with manual locking available as optional extra.

COLOURS

RAL/BS references for colours are provided as a guide only to the nearest similar RAL/BS colour. Colours will not match to other RAL/BS finishes due to different coating processes, gloss levels, substrates and textures. Similarly, special RAL, BS or other colours will not be a precise match.

The door panel, frames and window frame colour shade, and surface lustre will show some slight variation, this is due to different base materials and coating methods.

GSA / SLX Vision Sectional door

DOOR:

Sectional door panels made from hollow aluminium profiles, 40mm depth filled with 16mm scratch resistant, polymer double glazing. Sections have a centre seal; EPDM, header, and floor seals. Door heights are achieved by equal division of panel heights ranging from 300mm to 750mm. FRAME.

FRAM

Door frame is made from galvanized sheet steel, coil coated with polyester, prime coated similar to RAL 9016 or other Trend colour. Protective strips with EPDM sealing lips on both sides of the vertical tracks.

HARDWARE:

Hardware, galvanised finish, screwed hinges to all sections, adjustable rollers with ball bearings. Multiple tension springs and double cable system housed in low friction housing above horizontal tracks.

AUTOMATION:

Door prepared for automation as standard.

COLOURS

RAL references for colours are provided as a guide only to the nearest similar RAL colour. Colours will not match to other RAL finishes due to different coating processes, gloss levels, substrates and textures. Similarly, special RAL, BS or other colours will not be a precise match.

The door panel, frames and window frame colour shade, and surface lustre will show some slight variation, this is due to different base materials and coating methods.

NO HOLES FRAME FIXING

IMPORTANT !

When fixing a no-holes frame between the reveal you must secure the frame to the lintel as shown using the 'L' bracket supplied.

If a good fixing cannot be achieved, alternative fixing methods must be used to secure the frame.

300mm low headroom with rail operator is to prevent the top panel seal rubbing on the rail If this is not an issue then the door will fit in 280mm

SPECIFICATION

DOOR:

Sectional door double skinned PUR foam core, 40mm thick CarTeck panels. Outer surface finished in choice of 4 standard designs and all standard listed CarTeck colours. Inner surface stucco design, colour similar to RAL 9002. Sections have a centre seal; EPDM, header, and floor seals. Different order heights are made up from mixing panel sizes, 2 different bottom profile sizes and reduced top panel heights. Doors have reinforcing steel profiles on the rear of the panels.

FRAME:

Door frame is made from hot dipped galvanised steel sections. Protective strips with EPDM sealing lips on both sides of the vertical tracks.

HARDWARE:

Doors have galvanised frame legs and are supplied without a header strip. Hardware has galvanised finish, screwed hinges to all sections, adjustable rollers with ball bearings. Front or optional rear mounted torsion spring with load-bearing steel cables. 1 pair of tension bars.

AUTOMATION:

Electric 230V drive as standard, either direct or rail drive. Optical safety edge, hard wired to control system and photocells. Direct drive motor must have 13 amp supply direct to consumer unit. External release is not possible with direct drive motor, additional access must be available into garage.

COLOURS

RAL references for colours are provided as a guide only to the nearest similar RAL colour. Colours will not match to other RAL finishes due to different coating processes, gloss levels, substrates and textures. Similarly, special RAL, BS or other colours will not be a precise match.

The door panel, frames and window frame colour shade, and surface lustre will show some slight variation, this is due to different base materials and coating methods.

TECHNICAL CARTECK SIDE HINGED GARAGE DOORS GSW 40-L

Horizontal doors have 2 columns of features as standard arranged 1/2 – 1/2, changing to an asymmetric three columns at the width shown below. 1/2 - 1/2 vertical doors have 2 rows of features as standard changing to three at the height shown right.

SPECIFICATION

DOOR:

Door leaves are fabricated using 40mm thick CarTeck panels with an extruded aluminium perimeter frame and integral seals. Doors with the optional standard threshold profile have an EPDM black threshold seal at the base. Each leaf is fitted with three concealed hinges. Large doors and doors with asymmetric leaves may have three or more hinges per leaf. The door frame is a an extruded aluminium profile with mitred corners and integral seals, for details refer to technical leaflet. A 3-part stepped aluminium threshold is also included. Doors over 3000mm wide are supplied with the 1-piece threshold. 10mm tolerance should be allowed to facilitate frame squaring during installation.

Doors supplied open-out as standard. Open-in is available as an option – please specify when ordering. NOTE: open-in doors increase the likelihood of water ingress. We recommend the drip guard option is selected with open-in doors. HARNWARF.

Hardware comprises of a DIN standard CE marked European sashlock and a pair of stainless steel round bar lever handles on 50mm diameter roses. A Satin Nickel CarTeck lever handle is supplied with the 3-point hook locking option. A Euro-profile cylinder and thumb turn with stainless steel escutcheons is included as standard (double cylinder, key both sides is available as an option if required). Three keys are supplied with each cylinder. The inactive leaf is fitted with top and bottom recessed lever action flush bolts. A stay is fitted to each leaf to hold the door in the open position, any leaf below 810mm wide (including asymmetric side hinged doors) will not have a stay. Foot stops are available as an option and are suitable for any door leaf width. A friction stay is available for door leaves below 810mm wide down to the minimum leaf width of 500mm. Stainless steel** needs regular cleaning or will stain, especially in areas of high salt content. Doors installed in coastal/high salinity environments must be fitted with a 316 Stainless Steel lever handle upgrade or 3-point locking with CarTeck lever handle. Doors with standard stainless steel or black handles may experience corrosion of the handle and discolouration of the surrounding door finish. This will be excluded from warranty claims.

COLOUR:

The door frame and window frame colour shade and surface lustre will show a variance from the panel finish as the base material and coating methods are different. Where differing materials and process are adopted, such as side hinged GSW 40L garage doors, there maybe some colour matching variations. Differing light conditions may further reduce or highlight this effect. The colours RAL9006 and 9007 pose particular problems when colour matching. more information is available via the sales office. RAL/BS references for colours are provided as a quide only to the nearest similar RAL/BS colour. Colours will not match to other RAL/BS finishes due to different coating processes, gloss levels, substrates and textures. Similarly, special RAL, BS or other colours will not be a precise match. **For how to care for stainless steel see: www.teckentrup.co.uk/ garage-doors/frequently-asked-questions-fags

FITTERS TIPS SECTIONAL DOORS

FRAME TYPES & BETWEEN FIX

Which Frame type?

•	
- 1	
•	1
•	
•	

Standard Frame (with back fixing holes)

Use this frame for:

- Back-fix
- Part-within fix show up to 48mm of frame leg within the opening
- Between the reveal fix In conjunction with 3D profile covers

BETWEEN FIX

There are things you must do to ensure a sound installation on a no-holes frame: YOU MUST USE THE LINTEL FIXING TO SECURE THE TOP OF THE FRAME LEG OF A NO HOLE FRAME*

Pre-fitted Lintel fixing brackets - IMPORTANT! These must be used to secure the top of the frame leg, preventing lateral movement. If you can't use the bracket you <u>must</u> find an alternative means to secure

Stiffener brackets must be fitted to ensure the frame legs are prevented from twisting.

the frame leg.

*Not required on standard frame between fix.

Between Fix Frame (without back fixing holes)

Use this frame for:

- Between the reveal fix Up to a maximum size of 5500mm (18'0") wide and 2250mm (7'4") high
- Does not require 3D cover profiles

Optional extra accessories to make between fix easy:

Twist fix header kit When fitting between the reveal the frame header must be secured. The kit includes a pair of brackets that facilitate a solid fix for the header by providing a fixing point for "L" shaped brackets.

Kit Shown used with L shaped bracket

Between fix kit The kit includes brackets that allow a fixing to be made behind the frame leg and is suitable for both the standard frame and between fix frame. The kit also includes white grommets for filling exposed frame fixing holes if you are using a standard frame.

Between fix bracket shown from both sides on a no-hole frame leg.

L Shaped brackets Our L shaped brackets are supplied in pairs and might be just the job for securing that header in conjunction with the twist fix header kit!

FITTING TIP!

Before you fit the frame, fit the track curves to the legs, finger tight, so that when you position the frame between the reveal and access with a spanner is narrow, all the nuts will need is a nip to tighten!

Not sure what you need? Talk to the team about our between fix solutions!

COLOUR TIP!

If you're fitting part within or fully within the reveal and you want your frame and header to match the door, don't forget to order a colour matched frame and header! See the notes on colour on the pricing pages to confirm which colours are available.

3D PROFILE KITS

3D profile kits These profile kits not only provide a neat solution for covering frame holes on standard frames but also allow gaps to be bridged and overlap onto the opening face to neaten up edges. The profiles are supplied in 3m lengths for on-site cutting to size. Doors >3m will require a butt joint on the header, for a seamless header choose the 850 or 120mm 3D frame leg kit and additional header.

The kits:

85mm frame leg kit**	2no. 85mm x 12mm x 3000mm
85/120mm 3D profile kit**	2no. 85mm x 12mm x 3000mm
	1no. 120mm x 12mm x 3000mm
120mm 3D profile kit**	3no. 120mm x 12mm x 3000mm
*85mm frame leg kit & additional door header	2no. 85mm x 12mm x 3000mm (The additional door header will be supplied to the door ordering size +200mm)
*120mm frame leg kit & additional door header	2no. 120mm x 12mm x 3000mm (The additional door header will be supplied to the door ordering size +200mm)
70mm angle 3D kit	3no. 70mm x 12mm x 3000mm

* For doors over 3 metres wide - additional door header eliminates the join that would occur using a 120mm 3D profile (max length 3 metres)

85mm frame leg 3D profile kit

85mm frame leg 3D cover profiles for between the reveal fit with lateral movement for up to 30mm gap coverage or up to 30mm overlap.

85mm

Note: The frame leg 3D kit profiles are 12mm deep and will create a step at the header. Use an 85/120 3D profile kit for a flush finish.

The 3D profiles have a smart fixing that allows for lateral movement - perfect for bridging small fitting gaps or tidying up the front face of the opening. Shown here on the 85mm 3D profile.

85 mm

85/120mm 3D frame leg kit & additional door header

Perfect for doors over 3000mm wide - our 120mm 3D profile comes in 3000mm lengths requiring a butted ioint on the header for larger doors this kit includes a second full-width single piece header for a seamless finish. Choose kits with either 85mm or 120mm frame legs.

70mm angle 3D renovating profile

Use this when fitting behind the reveal or part between to neaten up damaged openings. The 70mm angle 3D renovating profile is held between the frame and the brickwork and will cover the back corner of the opening to tidy up any damaged wall edges. Ideal when removing timber frame and brick work deteriorated. Supplied in 3000mm lengths for on-site cutting to the required length.

85mm/120mm 3D profile kit Also available in a kit with a 120mm header 3D cover profile.

120mm 3D cover profiles for between the reveal fit at the front edge with lateral movement for up to 65mm overlap.

17

FITTERS TIPS SECTIONAL DOORS

USEFUL OPTIONS AND FITTING INFORMATION

240mm headroom kit This simple bracket lifts the tracks up an additional 120mm - great for getting over a gas meter or when a pass door comes into the garage – and it's free of charge. Just make sure you request it when ordering!

Spacer Bar Suspension Plates This bracket is needed when fitting a CarTeck DRIVE motor and you need to keep the motor within 120mm headroom. It allows the spacer bar to be lowered by 20mm (page 8 for pricing)

Twist fix frame leg retaining brackets Twist fix brackets are supplied with every size door but are not required on doors up to 2743mm (9'0") wide and 2250mm (7'4") high and under 70kg (You just fix straight through the frame fixing points for a secure and solid frame installation). Doors over this size do require twist fix brackets, they add rigidity to stop frame deflection.

Although not required on some doors, all fixing packs include them to assist with installation. They can be used outbound of the frame to locate a secure fixing when inbound fixing is not possible or sufficiently solid.

Why twist fix?

Simple – they just locate through the frame and twist into position ready for fixing through. No fiddly nut and bolt to secure each bracket, just a super quick twist, fix and done!

Twist fix brackets – no nuts!

Header positioning options on the frame legs

The two groups of three fixing holes at the top of the frame leg allow the header to be fixed at different levels relative to the top of the frame leg.

Omm sits flush with the top of the frame leg - the standard position.

- -10mm sits 10mm down from the top of the frame leg.
- -20mm sits 20mm down from the top of the frame leg.

-10mm and -20mm allow you to show an amount of header below the lintel when back fixing. This is useful if you want to even up the appearance when frame legs are showing within the reveal.

You can also use these positions to drop the header if the door is sitting low in the tracks to ensure the top panel closes against the top seal without a gap. -120mm sits 120mm

Send tracks up to the ceiling

To order a door with tracks & spring trays that mount at ceiling level and that are above 240mm headroom, price the height for the opening + lintel height and advise the office when ordering.

Sectional Garage Door Fitting

down from the top of the frame leg.

Use this position when fitting a 240mm headroom kit - it drops the header down 120mm to align with the top of the door panel.

Fitting videos

Fitting your first door, need a refresher or just want to pick up a few tips - watch the full job or jump to a specific section, it's a great supplement to the paper fitting instructions.

18

FITTERS TIPS SIDE HINGED DOORS

SIDE HINGED

Wind-out lugs to the side hinged frame for fast and easy frame setting Position the frame in the opening, wind out the lugs with a 4mm allen key until the frame is true, level and square... ...and you're ready to fix.

No more fiddling with wedges or packers to get things set. Simple and fast frame setting! Up to 20mm of adjustment is possible on each side of the frame.

Do not use an impact driver or power tools to extend the lugs. Use a manual allen key ONLY!

2 lugs at each of the four fixing points per side.

Lugs are accessed through the frame fixing hole.

316 Stainless steel handles for coastal/high salinity locations Doors

installed in coastal/high salinity environments must be fitted with a 316 Stainless Steel lever handle upgrade. Doors with standard stainless steel or black handles may experience corrosion of the handle and discolouration of the surrounding door finish. This will be excluded from warranty claims.

Concealed hinges Doors are supplied with two or three concealed hinges per leaf, dependent on size. With no hinges at the edge of the frame, trimming up your opening is easy.

The concealed hinges are very easy to adjust, see for yourself:

CONCEALED HINGE

ADJUSTMENT

VIDEO - SCAN ME!

Vertical alignment Use a T25 Torx to loosen these two screws to allow the leaf to move up and down in the frame profile, then tighten. All hinges will require adjustment.

Leaf-to-frame clearance Use a T25 Torx to loosen these two screws, align using the slotted hole, then tighten. One or all may require adjustment.

Gasket clamping force Use a T25 Torx to loosen these two screws, align using the slotted hole, then tighten. One or all may require adjustment.

Trimming up Concealed hinges make trimming up simple. If your trim overlaps onto the frame, ensure it is <10mm thick. Trim thicker than 10mm will foul the arc of the door leaf preventing full opening.

Fitting videos

Fitting your first door, need a refresher or just want to pick up a few tips watch the full job or jump to a specific section, it's a great supplement to the paper fitting instructions.

Teckentrup is a family business with operations throughout the world. In the UK Teckentrup is based in Warrington, Cheshire. Teckentrup products are available through a national network of independent Garage Door Specialist installers.

Teckentrup offers more than garage doors: We provide solutions and have set three quality standards for our garage doors:

We combine ease of use with aesthetics.

Good design uses innovative technology to make using a product intuitive and effortless. Teckentrup garage doors offer a wide range of design options that will transform the look of your home and the way you use your garage space.

Safety & Security

We combine security with safety.

Our products are designed to provide peace of mind with both physical security and the knowledge that durability and safe operation are inherent.

Service

We combine speed with reliability.

The Teckentrup team and our network of Garage Door Specialist installers love to make your new door a pleasure to own. You'll always receive expert advice and the best service for installation, maintenance and aftercare.
