## RELAY & ALARM BUZZER

### What's it for and what are the benefits?

A relay allows control of other garage or garden security lighting to act as deterrent in and around your garage. The relay also allows lighting activation when you open your garage door. When the motor senses it is being forced the alarm buzzer outputs a loud signal tone as a deterrent. It can also be set to output a warning buzzer as the door closes (this must be programmed by the installer).

### How does it work?

The buzzer sounds when the motor senses an attempt to force the door up is being made. The relay allows control of your lighting inside and out of your garage further deterring potential intruders and illuminating your garage.

### What does it need to make it work?

It is an addition to the Teckentrup DRIVE / DRIVE PRO 500 & DRIVE /DRIVE PRO 600 garage door motors.

### What else works with it?

It operates as a stand-alone unit or can be fitted with other Teckentrup DRIVE accessories.

### How much is it?

See the current retail price list.
