

WHEN TO CHOOSE... CARTECK AUTOMATIC GARAGE DOORS

Product Designed For YOU

CarTeck has been optimised to bring a product and service package that make surveying and installing our garage doors trouble-free. Every eventuality has a clever solution to give your customers the very best garage door...

When you want less packaging and more storage space...

We use a cardboard and plastic flat packing system. All your tracks and hardware in one neat, space saving box. Less waste, more storage space, more environmentally friendly. Easier to handle too.

When you need faster turnaround – just 2 weeks!

2 weeks lead time on over 90% of doors we sell. Why make your customer wait? Get it fitted and get paid!

When you need a sloping bottom panel to suit an uneven floor...

Got an uneven floor? Customer has their heart set on a sectional door? Our sloping bottom panel can make that a reality!

When you need an even panel configuration...

Even panel configurations are more aesthetically pleasing and make windows in top panels easy to achieve. No more strange looking 5 panel doors! **We can even provide four panel doors up to 2280mm!**

When you want easier between fits – no-hole frames and better brackets...

We provide door frames with no back-fix holes and our between-fit side anchor brackets span voids in the wall. Pre-fitted top brackets adjust to suit the lintel above. Our brackets just work and save time.

When you need high lift tracks to clear a side wall obstruction...

Our simple and easy to install high-lift solution is at no extra cost, just ask for it when you order! The 240mm headroom kit allows the ideal panel configuration to suit the opening, but lifts horizontal tracks up.

When your customer wants a special design...

Our standard range of windows offer more options than most, but we can accommodate almost any special request. Just tell us what your customer needs and we can make it happen!

When you need to match an unusual colour...

We can paint a door in any colour you are asked for -RAL, BS colours, Farrow & Ball, to match windows, doors, cladding and more. The options are, literally, unlimited.

When you want low headroom extension springs on every door!

95%+ of all doors feature 120mm headroom including electric operation, only the very largest need fractionally more, at 140mm. There is no need to worry about whether a door will be extension or torsion springs, if it's CarTeck – it's extension springs!

WHEN TO CHOOSE CARTECK

When you're sick of arguing about warranties...

All we require to provide the replacement parts you need, is your word. Don't stick with a supplier where your word isn't good enough! Don't ever get stuck needing to travel miles back to an installation simply to take pictures to prove what should be taken on your word!

When you need replacement parts in days, not weeks...

Whatever you need it's on the shelf in our Warrington factory. So whether it's for a warranty or to repair a damaged door, you will get it done much more quickly with CarTeck!

When you prefer a simple price list...

Don't get caught out by confusing price structures. All doors, all styles and all textures are simply tabulated. Choose white, trend or RAL colour and add your options - it couldn't be simpler!

When coloured frames cost too much...

CarTeck trend coloured frames are a fraction of the cost other manufacturers charge for their often wet-sprayed frames.

When CE marks and compliance matter...

All our doors, at all sizes and with all spring assemblies have been tested for compliance with all major automation systems. No requirement to use our motors and no safety concerns if you don't.

When you prefer a tried and tested safety system...

The CarTeck double-cable anti-fall protection system is a tried and tested solution for double width doors with extension springs. CarTeck springs are held by 4 cables as standard - this means that, should a cable fail, three remain, which is sufficient to close the door and allow a planned repair.

So, there you have it. A rather compelling list of reasons to choose CarTeck and Teckentrup.

Want a bit more detail?

Get a copy of our "Great Reasons to Sell CarTeck Automatic Garage Doors" for an in-depth look at the key sales points for consumers and the all the clever solutions for installation and details that will help surveyors choose the right door spec.

GREAT FOR SERVICE

WE ARE PASSIONATE

When you phone, write or e-mail you will get staff members giving you the answers to your questions. You will find us knowledgeable and passionate. Why? Because we care!
